

# How the Illumitube Works

The Illumitube is a magnificent pack of the newest technology. It is the best time machine in all of history. It is very simple to use and you can fit it in your bag. Do you want to know how it works? If so, read on.

## How it Works

First, flip the small, black switch at the back. Then, slip the device smoothly onto your arm. After that, adjust the colourful clock so it knows what time you wish to be in. Once you have done that, you might want to type in where you want to be. Next, aim the small sight at where you want the colourful portal to be. Finally, jolt your arm forward to shoot the portal and step through to break the rules of time. As a result, you shall be a time traveller!!!

**Warning:** always remember where you came from.
