

## How do you use the T.S.536?

The T.S.536 is an extraordinarily simple machine (dispite the complex name) that is extremely safe and fun to use. Once you have used this marvellous machine, you will become a time-traveller! The T.S.536 look like two boxes but is *so* much more, it is one of the first and safest time machines **ever!** Once you have become a time-traveller, you can boast to your friends, enemies and anyone you know. You don't need anything but the machine because it has anything you need inside it. Do you want to be a time-traveller and be an expert at time-travelling? Then read on.

### How it Works:

The T.S.536 will you travel anywhere any time in *literally* seconds and this is how. But before you start, take your time-traveller's card, put your finger on the fingerpad and then put the card in the slot. When you want to start your incredible adventure, you start by opening the blue hatch (which is on the left side of the bottom box) and getting the pencil and rubber out. You use the rubber to erase the present date. This causes you to no longer be in that date, so no-one can see you! **WARNING:** If you stay like this for over 10 minutes, then you will either die, be lost in time forever or be unconcious for 150 years, but not die and be the same age when you wake up. Next, you write the date that you want to travel to, for your unbelievably fun and exciting adventure. Now you have the date and month you want, you need the year. You now press B.C or A.D. Then, you put the correct digits for the year in. After you have done this, you have to change the time on the clock to the time you want it to be on the clock, or you can keep it the same if you don't want it to be a different time though. Put the pencil and the rubber back in the blue hatch. Switch the switch – which is on the right side of the top box- to activate the device. Wait for the yellow light to turn on and hold the T.S.536 by the sides and wait to be transported. Do this again to get back.

You can now travel through time and space with ease.it is also an extremely fun experience that anyone will enjoy. **WARNING:**if you are not holding the box when you switch the switch, it will leave without you and will be lost forever.
